Art Unit: 2652

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a magnetic head apparatus, classified in class 360, subclass 322.
 - II. Claims 7-9, drawn to a method of fabricating a magnetic head, classified in class 29, subclass 603.1+.
2. The inventions are distinct, each from the other because of the following reasons:
Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product as claimed can be made by another and materially different method such as a method not requiring "patterning", "shrunk resist pattern", etc... as set forth in group II as claimed. The product can instead be made by "casting" or sputtering" method.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
